

ProfitDriver provides Business Coaching and Business Consulting to business owners and business professionals all across the country.

Small businesses face many challenges; however, those challenges do not need to include a lack of focus and control. ProfitDriver partners with business owners and managers who feel overwhelmed or frustrated by their business and works with them to design strategies and goals so that both the owner and the business improve productivity and increase profits.

Business Coaching is about making improvements and changes so that you and your business perform at a much higher level, continually growing. Business Coaching helps you to get the most out of your time, resources and investments.

Business Consulting is a perfect complement to Business Coaching because we have the expertise and the experience to help you implement changes that add value to your business.

One of the many reasons that I enjoy working with small businesses is the passion that people have for their companies. My passion is helping people like you succeed.

Testimonials

"Invaluable."

John O'Donoghue, Owner

Quality Remodeling

"Liberating! From being run over by my business to running my business and enjoying it more, thanks to Tim and ProfitDriver."

Bill Larkin, Owner

The Larkin Painting

"Tim Kaelin helped our church and child care center to transition to the QuickBooks accounting software, and helped us to cut our time and cost of bookkeeping by more than 40%. His smart and professional work style made our transition easy. I highly recommend his work to your organization."

Reverend Noah Evans

Grace Church
